

I60 Boiler Room On/Off Switch

Brushed Stainless Steel

Low voltage circuit.

Mounts outside the steam room using standard single switch electrical box.

Connects to boiler using three conductor signal wire such as thermostat/alarm cable.

LED lights to indicate steam room is in use.

Push the I60's switch to start steam bath, push again to stop. The steam bath will automatically shut off 60 minutes after being turned on. Switches may be wired in parallel to use more than one switch per room.
